Information Security Policy (Varsity)

The objective of this policy is to preserve the **Confidentiality, Integrity,** and **Availability** of all the information assets of Department of Digital Technology (JTD) and to protect them from all threats, whether internal or external, intentional or accidental, by:

1. Ensuring the organization's information assets are protected through effective risk management and security controls.
2. Ensuring the Confidentiality, Integrity, and Availability of information are preserved through effective security controls and service continuity management.
3. Ensuring users' information security requirements and issues are addressed effectively to support the continuity of the University's operations.
4. Ensuring compliance with legal, regulatory, contractual, and guideline requirements related to information security.
5. Ensuring staff possess the necessary competence and receive ongoing information security training and awareness.
6. Ensuring information security objectives are established, monitored, and reviewed periodically.
7. Ensuring continuous improvement of the Information Security Management System (ISMS) is implemented effectively.
8. Securing support, commitment, and resources from top management to ensure the effective implementation of the ISMS.
